

# Possible symptoms until Minish fitting check

You can brush or take care of your teeth as usual

- You can brush or take care of your teeth as usual.
- There could be a sandy feeling on the tongue.
- There may be slight discomfort when you bite.
- The remain adhesive between Minish and the gums may come out, but it's normal you don't have to worry.
- There could be temporary soreness or sensitivity even if the irritation given is very subtle.

**These are all possible symptoms.**

We will check all the uncomfortable areas and finish in detail at fitting check, so don't worry and come to the hospital for the fitting check.
